5 Million Fraudulent Illegal Alien Mortgages May Lead to Disaster

According to a report by the U.S. Department of Housing and Urban Affairs, illegal aliens may have fraudulently purchased in recent years as many as 5 million homes in the United States. The loans used to pay the properties were obtained illegally through the use of Mexican identification cards or stolen identities of American citizens. U.S. Banks are now on the hook for billions of dollars in mortgages that illegal aliens have no intention of ever paying back.

"The open-borders lobby has

Foreclosures on 5 million homes purchased fraudulently by illegal aliens could help collapse the American financial system.

gotten everything it wanted and now ordinary Americans are going to pay the price," says U.S. Border

Security Council Executive Director Brice Griffin. "They wanted millions of illegals to come here. They wanted lax credit standards. They wanted every illegal alien to own a home and now our economy is teetering on the edge of economic depression," Griffin laments. "This is a really dangerous situation."

It appears that many illegal aliens went to great lengths to con banks into providing them with huge mortgages they couldn't af-

Council Launches National Survey on Community Effects of Illegal Immigration

The U.S. Border Security Council is launching a nationwide effort to survey ordinary Americans about the effects of illegal aliens in their communities.

The Immigration Field Study, will be one of the first and certainly most comprehensive efforts to gauge how illegal immigration is affecting the everyday lives of ordinary Americans.

It will cover a wide range of

topics and situations involving the effects of illegal immigration on the way Americans live their lives.

"We want to know to what extent people are being inconvenienced or harassed by service workers who can't speak English. We want to know if everyday activities like church services or school activities are being disrupted to accommodate illegal aliens," explains Council Executive Director Brice Griffin. "Once we know the full

extent of this problem, I am going to send this report to Capitol Hill and show the politicians the extent of this problem."

Many politicians seem to believe that the problem of illegal aliens is confined to the big cities or the regions along the southern border.

"I do not believe that is the case and this giant survey should prove it," Griffin says. "There will be no more excuses from politicians about how illegal immigration is a local problem."

Border Security News in Brief

Federal law enforcement officials last summer scrapped a test run of a “self-deportation” program in which aliens under deportation orders in the U.S. would volunteer to return to their homelands. Only eight aliens volunteered for the program.

The Georgia state legislature recently passed a new law making it a felony to drive without a license. The measure was aimed at illegal aliens in Georgia who speed along that state’s highways.

Illegal alien Juan Carlos Rojas-Sierra recently confessed to sexually assaulting a physically disabled woman in Waukesha County, Wisconsin. Rojas-Sierra broke into the woman’s home and assaulted her while she was sleeping. The crime is very unique for the suburban Milwaukee community. However, random acts of violence are being committed by illegal aliens in almost every community in the nation.

A recent study conducted by the Maricopa County Attorneys office in Arizona detailed the devastation being wrought on that county by illegal aliens. The study found that: In 2007, illegal immigrants accounted for:

- 16.5% of those sentenced for violent crimes
- 18.5% of those sentenced for property crimes
- 33.5% of those sentenced for the manufacture, sale or transport of drugs
- 50% of those sentenced for crimes related to “chop shops”
- 35.8% of those sentenced for kidnapping
- 20.3% of those sentenced for felony DUI.

SNEAK OF THE MONTH: San Francisco Mayor Gavin Newsom

San Francisco Mayor Gavin Newsom, is November’s “Sneak of the Month” for his bizarre and dangerous policies towards illegal immigration.

Newsom, a die hard open border advocate, was recently discovered to have implemented a policy whereby violent illegal aliens detained by San Francisco police were being relocated to private halfway houses where they could escape.

Newsom was chastised by the media as well as the U.S. Border

Security Council for his reckless policies and his blatant hypocrisy.

On one hand Newsom is fighting tooth and nail to keep San Francisco’s “sanctuary city” status. Meanwhile he is taking violent illegal aliens, who have flocked to his city because of its policy of offering sanctuary, and dumping them on unsuspecting communities where they can escape and reek havoc.

For being a dangerous hypocrite, Gavin Newsom is November’s “Sneak of the Month.”

Help Defend Our Borders!

I want to help defend America’s sovereignty from the invasion of illegal aliens. Enclosed is my contribution of:

\$10 \$15 \$25 \$50

Fraudulent Loans Could Cripple Economy (continued from page 1)

ford and had no intention of paying. And now the banks are paying the price.

The giant lender Wachovia recently faced imminent collapse before being purchased by another institution. Wachovia was infamous for marketing its services to illegal immigrants.

“No one really should be surprised by any of this,” says Griffin. “After all, illegal aliens are by definition criminals. They broke the law by sneaking into this country. It seems only logical that they would steal someone else’s identity and lie on a mortgage application in order to get a loan. Then, when the bank demands payment of the mortgage, these illegals just move to a new town and start all over again.”

The foreclosure crisis is also depressing home prices for ordinary Americans. The illegal aliens don't care.

The mortgage crisis that in recent weeks has sent the stock market reeling and the government scrambling to bailout banks will only be exacerbated by the illegal aliens’ fraudulent mortgages.

“From everything I’ve read, we have only begun to unravel this massive problem,” explains Griffin. “There are millions and millions

of illegals in the U.S. There will be more and more foreclosures and more and more economic hardship for law abiding Americans.

Griffin also points out that the open borders lobby continues to insist that illegal aliens truly do care about America and its citizens.

“If these invaders cared about this great nation and our citizens, they wouldn’t be destroying it through their illegal behavior. No one in his right mind believes that any illegal alien cares that their actions are undermining housing prices and hurting ordinary Americans. These are selfish people who could care less if America is plunged into an economic depression.”

Council Launches Immigration Field Study (continued from page 1)

The Immigration Field Study will involve mailing a comprehensive survey to supporters of the U.S. Border Security Council all across the nation. All recipients are urged to fill out and return the survey promptly. Then, the Council will tabulate the results and make a detailed report to Congress and supporters.

“This is a very exciting project,” says Griffin. “It is high time ordinary Americans are allowed to express their opinions on exactly how illegal immigration is affecting them.”

The Immigration Field Study is just one of a number of new projects being rolled out by the U.S. Border Security Council for 2009.

“The new Congress will be more hostile to border security than

any other Congress in this country’s history,” Griffin explains. “We are going to have to be very cre-

“We want to know if everyday activities like church services or school activities are being changed to accommodate illegal aliens,” explains Council Executive Director Brice Griffin.

ative and very aggressive in order to get our message out.”

The Immigration Field Study is a major step in this effort.

“It is going to be awfully hard for a Member of Congress to vote for amnesty or additional benefits for illegals when confronted by a report saying his constituents are being adversely affected by illegal immigration,” says Griffin. “That is the point of this report.”

Supporters should be soon receiving their survey in the mail. Recipients should take their time and think carefully about the questions and then answer them honestly. The results of each question will then be included in the final report to Congress.

The Newsletter of the U.S. Border Security Council. *U.S. Border Security Info* is a periodic publication of the U.S. Border Security Council. Articles may be reprinted as long as they are attributed to the U.S. Border Security Council.

The U.S. Border Security Council is special project of AHEAD which is recognized as tax-exempt under Section 501(c)(4) of the Internal Revenue Code. Since we lobby Congress donations are not tax-deductible.

**From the
Executive
Director:**

Page one of this month's newsletter explains a very important project for the U.S. Border Security Council -- our National Immigration Field Study.

This effort is a a comprehensive effort to determine exactly how illegal immigration affects you.

Please be on the lookout for this important survey and take a few minutes to fill it out.

You and I know that illegal immigration is a problem. However, too many of our elected officials don't believe it.

These politicians claim that illegal aliens are only a problem in big cities and along the border.

That's ridiculous. And I intend to prove it with the results of this important survey.

Please fill yours out and return it as soon as possible.

Bruce Griffin

Border Security Talking Points

Open borders advocates love to use myths and outright falsehoods to push their pro-illegal alien policies. Here are just a few facts and figures you can use when debating the urgent need for border security:

- ☆ There are now at least 13 million illegal aliens living in the United States. The illegal population is greater than the entire population of Illinois, the fourth most populous state.
- ☆ American taxpayers have had to pay almost \$400 billion in social service benefits to illegal aliens since 1996.

- ☆ Over 2.1 million "anchor babies" have been born in the United States since 2002. These children are considered U.S. citizens and will be allowed to vote.
- ☆ Since 2005 ICE has arrested 8,000 immigrant gangsters. These violent criminals hail from an amazing 700 different gangs.

- ☆ Over \$300 billion has been wired back to Latin America by immigrants. This money is critical to keeping many Latin American dictators in power. Without it, their peasant populations would revolt and demand political reforms.
